Peerless Achieves ISO 14001 Certification

Sustainability and Efficiency a Focus for the Future

Indianapolis, IN — 02/01/08 — Peerless Pump Company announced that in addition to the ISO 9001 Certification it holds, it has been awarded ISO 14001 Certification for their manufacturing headquarters based in Indianapolis, Indiana. Employing three-hundred people, Peerless embarked upon this goal in 2008, by hiring a dedicated Environmental Coordinator. “It was a journey that began with paper and aluminum recycling and continues today with more work on efficiency and community involvement” said Todd Walterman the person who assumed the Coordinator role with Peerless. “Like much of what we do at Peerless, we did not embark upon this level of environmental awareness strictly for business reasons, we did it because it was the right thing to do, and this is just the start of what we have planned,” Walterman said.

ISO 14001 environmental management standards help organizations minimize how their operations negatively affect the environment (cause adverse changes to air, water, or land) and comply with applicable laws and regulations.

“You could say that Peerless was concerned about energy efficiency before it was popular” said Fred Bock, Peerless’ Vice President of Marketing. “The design and manufacture of efficient and durable centrifugal pumps has always been a focus at Peerless. Making the ‘cheapest’ pump is never our goal, we strive to design what is best for our people, our customers, the environment, which is even more important today” Bock added.

A part of the Grundfos Group of Companies, Peerless Pump Company is a global leader in fluid handling systems. Based in Indianapolis, Indiana, Peerless has facilities throughout North America and the world. Serving the pump industry for more than 85-years, Peerless serves many markets including fire protection, municipal, commercial, and agriculture.
