

GENUINE REPLACEMENT PARTS

For ANSI / Process Pumps

Peerless Pump is firmly established as a top ANSI pump and parts supplier. Our commitment to quality is reflected in our ongoing research and development efforts. Our philosophy is to deliver OEM quality without charging the high prices typical of other OEM suppliers.

PARTS

Peerless Pump casings are manufactured to the industry's toughest standards. The Wear Extender™ replaceable suction wear plate (available in various alloys) fits perfectly inside the casing to take the wear and eliminate the need to replace the entire casing.

Peerless Pump Impellers are perfectly matched to your casing, precisely machined and dynamically balanced to ensure a perfect fit for smooth operation. The fully open design with back pump-out vanes assures an even flow for maximum performance and long life.

Peerless Pump stuffing boxes and seal chambers accommodate all types of mechanical seals and packing, with replaceable bushings.

Peerless Pump frame adapters are fully machined in ductile iron (also available in cast iron, carbon steel and 316 stainless steel). Like all replacement parts, they are built using the latest technology to meet exacting specifications.

The Peerless Pump power end program allows for replacing power frames instead of rebuilding them at high cost.

Peerless Pump shafts and sleeves are manufactured on state-of-the-art machining centers. Computer-controlled lathes maintain tight tolerances and guarantee repeatability for long life and reduced wear.

Peerless Pump sleeves are manufactured with computer-aided techniques that allow us to keep pricing competitive by producing the correct parts in a fraction of the time required by in-plant maintenance personnel.

BENEFITS

- High-quality products
- Large inventories
- Worldwide stocking locations
- Guaranteed performance
- Extremely competitive prices
- Dedicated customer service people
- All in-stock parts shipped within 48 hours (or less)

SPECIFICATIONS

Engineering Impellers, wear plates, sleeves, shafts, stuffing box covers, casings and other wear parts are engineered to perform better than original factory specifications.

Compatibility Our 8196 and 8175 parts are compatible with Goulds™ 3196 and 3175 models.

8196 Interchangeability

8175 Interchangeability
